linkedin.com/in/miguel-cardoso-32428314b

SKILLS

Cloud

AWS, GCP, Azure, Hetzner

Infrastructure

Kubernetes, Docker, Terraform, Ansible, Helm, Kustomize

CI/CD

ArgoCD, Buildkite, Jenkins, GoCD, GitHub Actions

AI

AI-Assisted Workflows, LLM APIs, Prompt Engineering, AI Agents

Observability

Prometheus, Grafana, Thanos, Datadog, SigNoz

Languages

Python, Bash, C#, SQL, YAML

EDUCATION

BSc Computer Engineering

ISEP — Instituto Superior de Engenharia do Porto

2015 — 2018

- Specialised in software engineering, algorithms, databases, and web development
- Built a sports-venue booking platform over two semesters with ARMIS Group using Scrum, JIRA, and bi-weekly client sprint reviews
- Took part in an MIT-led program applying engineering fundamentals to real-world industry projects

PROFILE

I'm someone who enjoys figuring things out and learning along the way. I like working with people and doing my part to keep things running smoothly.

When I'm not working, I keep busy with a mix of hobbies — playing guitar, football and videogames, riding my motorcycle, hanging out with my cat, and hitting the gym to relax and recharge. I'm a big football fan, and even coached a U10/11 academy team.

Professionally, I love the IT world — specifically the DevOps / Infrastructure side — because it lets me do what I enjoy most: automating and organising things.

EXPERIENCE

DevOps Engineer · Icligo

2026 — Present

- Building infrastructure for an AI-first travel platform covering accommodation, flights, and trip planning
- Designing and operating a microservice architecture on Kubernetes for scalability and independent service delivery
- Leveraging AI-powered workflows and tooling across development, automation, and day-to-day operations
- Establishing CI/CD pipelines and observability foundations for the new platform

DevOps Engineer · FanDuel

2021 — 2026

- Ran infrastructure for the largest online horse-betting platform in the U.S., serving millions of high-traffic users daily
- Led the platform's full migration from GCP to AWS across multiple Kubernetes clusters for global scale and resilience
- Built a monitoring stack from scratch (Prometheus, Grafana, Thanos) for distributed clusters at scale
- Designed a GitOps CI/CD pipeline with ArgoCD and Buildkite for consistent, auditable deployments
- Centralised secrets with HashiCorp Vault and standardised provisioning via Terraform, Ansible, and Packer
- Authored a disaster-recovery playbook covering all infrastructure components

DevOps Engineer · Farfetch

2019 — 2021

- Supported and scaled infrastructure for a global luxury-fashion marketplace serving millions of users
- Automated large-scale deployments on Azure with Terraform and Docker
- Streamlined release pipelines with Jenkins and improved observability with New Relic
- Maintained asynchronous messaging (Kafka, RabbitMQ) and standardised configuration with Salt and Chef

DevOps Intern / Junior Full-Stack Developer · ARMIS Group

2018 — 2019

- Built a CI/CD proof-of-concept that delivered fully automated builds and deployments
- Developed full-stack features — frontend, backend APIs, and database design — for a real-time road-incident platform
